

A note from the student behind this lab

This is an **independent, free, learning-only student project**. It respects every company and vendor, and every trademark belongs to its owner. It is **not affiliated with or endorsed by** any of them.

If anyone has a concern, the content will be removed or corrected promptly: please write via <https://cyphermonkeylabs.com/#contact>. Nothing here is sold, and I am happy to volunteer for any organization.

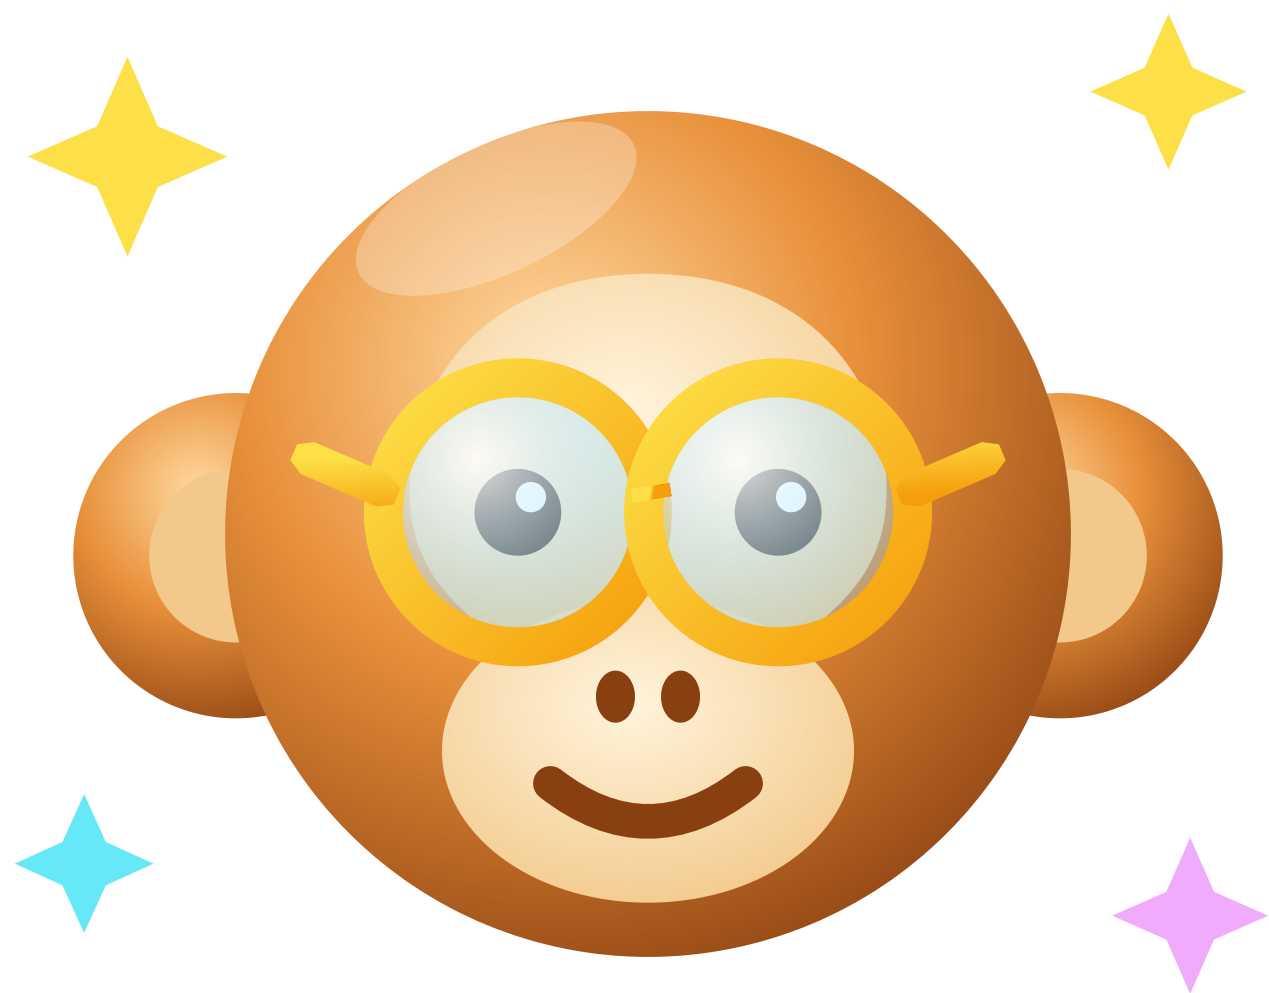

Capture worksheet

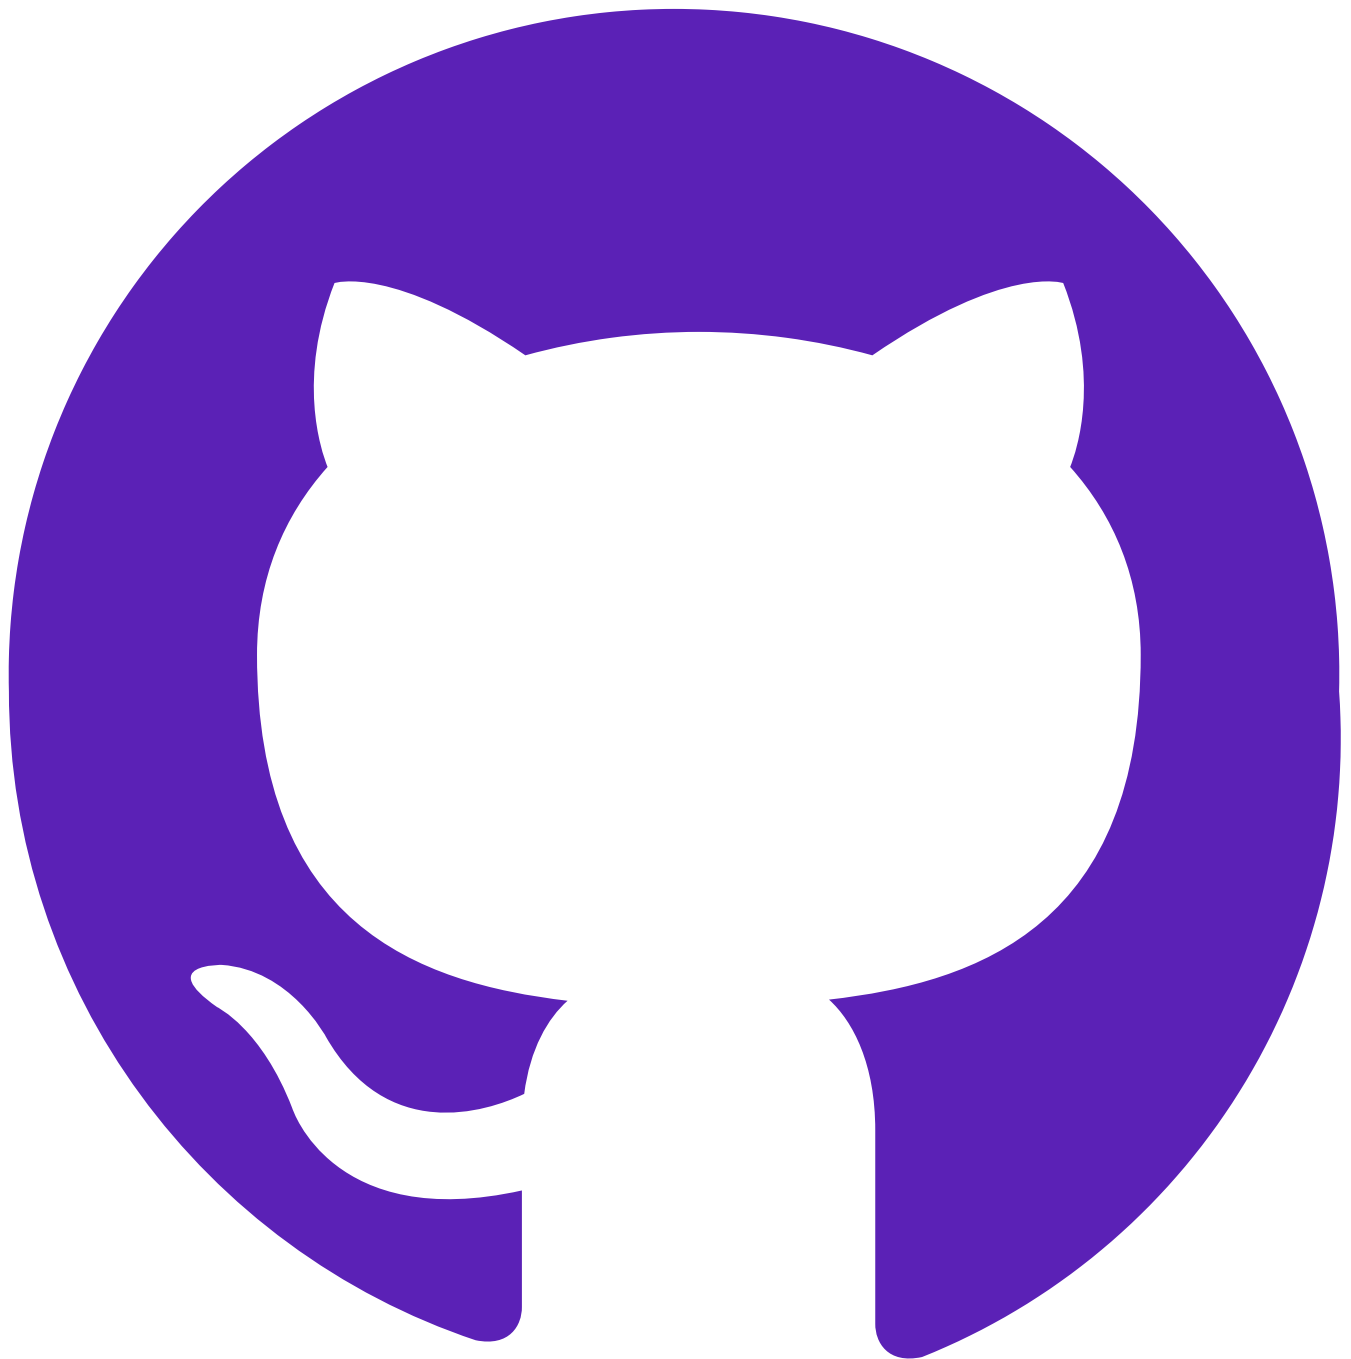

1. Filter on the signaling port you meant to use.
2. Find the Call-ID.
3. Mark INVITE, provisional responses, final response, ACK, and BYE.
4. Open SDP and write down c= and m=.
5. Only then compare with sngrep or the PBX debug.
